Introduction

About Us

In light of the growing urban renaissance that Saudi Arabia is experiencing, represented by giant government projects and distinguished private projects, which led to an increasing need to raise quality and specifications of construction and implementation techniques and resources used. And with the scarcity of national companies with competence and knowledge in the field of specialized finishing, the vision of Arabianscape Company (Previously called Star Taiba Contracting Company) emerged to establish a national entity with international standards and specification. A group of distinguished engineers and administrators with distinguished and diverse experiences in various engineering and administrative fields contributed to the establishment of this entity and the development of strategies, plans, and administrative and technical standards that ensure the provision of the best services and the highest quality standards in the fields of contracting, specialized finishing and hotel furnishings. We are pleased to offer you a modern model for contracting companies to form a leap in the concept of working in this field. Arabianscape is betting on the capabilities and qualifications of its leadership and employees, who have been chosen with great care to achieve the company's goals and the aspirations of its customers.

Arabianscape started its activity in Madinah, then the company covered most of the Kingdom's regions. Arabianscape plans to expand to provide its services and products to all regions of the Kingdom and expand outside it.
